PORTALE

Misura Struttura

Le arcate vanno montate in modo che **i 4 incroci siano imbullonati** fra loro per conferire rigidità all'intreccio delle arcate. Il codice del bullone da usare è: 0100BUL037S M12x200mm. A meno dei due primi giunti a partire dal lato che appoggia a terra, tutti i giunti hanno un $\pm 3^\circ$ di regolazione per ogni palo, in modo da riuscire a modellare le arcate e fissare le intersezioni.
